Ex-Premier H. H. Asquith Makes Little Response To Lloyd George Appeal

Has No Use for Centre Party to Fight Labor Which Is Said to Be Idea Favored by Lloyd George—Decries Any Dramatic Move to Restore

CAMBRIDGE, England, March 7.—Former Premier H. H. Asquith, in a speech here tonight, made only the faintest response to the overtures of Lloyd George for Liberal union, and expressly denied that such union could be achieved with an anti-Laborite platform or by means of a so-called centre party. He argued that it must first be known whether the idea of a centre party had been abandoned.

"In such a party," he said, "I tell you plainly, there is no place for me, or, I believe, for many of my friends."

This frank declaration seemed to rule out completely the idea said to be favored by Lloyd George of a new centre party composed of the moderate elements of the Liberal and Conservative parties to counter the growing strength of the Labor party. Speaking generally, Mr. Asquith decried any dramatic effort to bring about a new union, and said nothing to imply any such thing.

Leader 15 years, Not Averse to Deposed

He said that so far as the leadership was concerned, he had been elected the party leader 15 years ago, and was not aware that he had been deposed. He said the difficulties confronting Liberal Union mainly related to the house of commons, and that a dozen Liberal Union members had been elected to the house of commons, and that the Liberal Union had no quarrel with the Labor party, but that the Labor party had a quarrel with the Liberal Union.

All Parties Discuss Recent By-Elections

LONDON.—March 7.—(Guendian Press cable).—If the excitement which was produced in the lobby of the house of commons last night by the announcement that the Education bill would be introduced, the government has somewhat shakily, members of all parties are all eagerly discussing the events of the night.

Mr. Asquith made the difficulties confronting Liberal Union mainly related to the house of commons, and that a dozen Liberal Union members had been elected to the house of commons, and that the Liberal Union had no quarrel with the Labor party, but that the Labor party had a quarrel with the Liberal Union.

CO-ORDINATION FAILED.

Evidently things have got the past where even the head of the Provincial University cannot preserve harmony in the U.F. caucus. That perhaps will discourage further attempts to turn the faculty of the university into a "general staff" for a political party.

AMENDMENT MUCH IN ORDER.

It was hardly to be expected that the Legislature would throw out the Public Utilities bill. That might have thrown out the Government and brought on a general election. But it may be hoped that the members will tone down the automatic features of the measure into some sort of conformity to the canons of responsible government and the dictates of economy. Neither the Province nor the public can afford to support expensive commissions in order to relieve Ministers of what should be departmental duties, and the remaining members of the Legislature have their control over municipal expenditure handed over to a body that is in no sense responsible to them.

HERE HONOR IS DUE.

Toronto honored itself in honoring Dr. Banting and his associate in the discovery of a cure for diabetes, which means death. Those who are debtors to those men beyond the chance of payment, and a year from now there will be a heavy burden to be paid. It is to be hoped that the second thought will prevail over the anxiety to preserve party harmony and to prevent a break-down of the administration. Otherwise the public service of the province will be bedevilled. There has been a vast amount of talk in U.F.A. circles about keeping the civil service free from politics. The incident under consideration is a precedent for taking the civil service by the scruff of the neck and dragging it into party politics, and a precedent for the government to be responsible for the thing that is to happen. There is plenty of room for argument as to whether the public get for their money under the civil service commission, but that is not the question. It is to be hoped that the former system, by which the civil service was to be done openly and not by methods of hypocrisy.

A HALF-HOLIDAY FOR SOME.

As matters stand we are to have a half holiday for store workers each Wednesday during the four months of the present year. That is to say, they are to be employed in drug stores, news stands, restaurants, confectioneries, garages, service stations, tobacco stores, book stores, and so on. That hardly seems consistent. The theory of it is that everybody needs to lay off a half-day during the week to rest, or to do some work at a picnic, or to make garden, and that the improvement in the general health would make up to the community what it must lose through the suspension of business. If that theory is sound the logical thing to do is to make it a hundred-per-cent half holiday. Who found the notion that it was no more wearing to wrap up in a blanket than it is to sell cigars, distribute soap, or have planks in a lumber yard? If three days at a stretch is about all the average store worker can stand, then the present arrangement is a bit of a stretch, there does seem to be some consideration coming to those luckless followers of the specified branches of trade. Doesn't anybody care anything about the health of those of the hash factory?

WHY NOT DO IT?

The agitation for the creation of storage and cleaning elevators in Alberta continues, with a strong tendency to develop into an appeal to the Dominion Government to provide the necessary funds. There might be quite a number of capital stepped in to meet this want. Ottawa is deluged with appeals for money, and money is scarce there as elsewhere. It is better that it be constructed out of taxpayers' money. It is a commercially feasible proposition, and one that should offer attractive returns on the capital employed. If the Western route amounts to anything at all, the grain gain that way will have to be cleaned somewhere. It is better that it be done in Alberta, and the screenings kept where they are needed for stock feed. The feed value of the screenings is quite sufficient to justify a trade in grain for them on a cleaning plant, and it would help just now in a good many ways if Albertans stopped calling on Governments to do things for them and began to show a disposition to do things themselves. Edmonton men who have money to invest might well turn this matter over to their minds and see if they cannot find a way that will produce results by the time next summer's crop begins to move.

BROADENING OUT THE CAUCUS.

The new lively caucus in the Legislature today because the head of the Provincial University had been called in to address a caucus of the Government members. Yes, caucus is the word. They have been doing it again. Which is to say, they are doing it yet. And they intend to keep right on doing it. The Minister of Education said so, and explained why. He said when he was down on the farm it seemed to him that the caucus was all that he and his fellow U.F.A. candidates were saying about it, but when he came to view matters from the standpoint of the Government, things took on a different aspect. That may not sound altogether convincing in all quarters, but it is a good solid reason all the same. And whether the reason is good or bad, the caucusing is to go on. Mr. Wood may not like it, and the new member for Calgary—elected under the patronage of Hon. Alex Ross—may protest about it. It may be a standing repudiation of election pledges and all that. But the caucus was here before the U.F. Government came into existence and will be here when it has collapsed. So far from abolishing it, or trying to, the presently dominant party in the Legislature got into caucus as soon as they had shaken hands with the first session opened, have caused more incessantly than the supporters of any preceding Government and have broadened out the character and function of the caucus beyond anything their predecessors thought about or dared do. Alberta today is governed by caucus. The public sessions of the Legislature are a mere formality, and when decisions reached behind the barred doors of the party convalesce are announced to the public and given the legal seal of approval. There was never any sound reason why the caucus should be abolished, nor any real chance that it would be, but there is even less reason why it should have been opened up to the functions of the Legislature in the way it has done since the champions of the new democracy began to see matters from the standpoint of the governing party, instead of from the angle of the governed people.

As to this new departure in broadening out the caucus, the protest is entirely in order, though it will not likely do any good. For one thing, this is the first time that the university has been brought into association in any way with the machinery of party politics. That precedent does not look good, especially when the university is so far from being a body of disinterested scholars, as it is now, that it is being used as a tool for the purpose of party politics. It is to be hoped that the second thought will prevail over the anxiety to preserve party harmony and to prevent a break-down of the administration. Otherwise the public service of the province will be bedevilled. There has been a vast amount of talk in U.F.A. circles about keeping the civil service free from politics. The incident under consideration is a precedent for taking the civil service by the scruff of the neck and dragging it into party politics, and a precedent for the government to be responsible for the thing that is to happen. There is plenty of room for argument as to whether the public get for their money under the civil service commission, but that is not the question. It is to be hoped that the former system, by which the civil service was to be done openly and not by methods of hypocrisy.

There is no objection, of course, to members who support the Government seeking information from the university. But the question is whether it is likely to find it. That they sometimes need information may be, and the public interest will be better served if they get it. But there are proper and improper ways of going about the quest. If expert information or opinion is to be sought to the end that legislation shall be passed, it is better that the information be given to the members of the Legislature by the person concerned is an employee of the Province or the holder of any position in any way dependent upon the good will of the Government. Otherwise both the Provincial University and the public interest are being sacrificed to the interests of a political party.

THE WHEAT MARKET IN CHINA.
Canadian Trade Commissioner at Shanghai.
The premier of the Republic of China, which was held in the spring of last year was despatched when the crop season was under way, and it is apparent that the wheat supply will be short, at least in the early months of the year. The wheat from the four to South China ports in large quantities. In the latter months (April to June) wheat is further and increased importations every month to the ports of the coast. Chinese grain is being retained from importing American wheat, hoping to obtain a better price for their own wheat. It is obtained in this they were disappointed, for it was found that the American wheat was better than their own. On account of a little demand for wheat by the United States, the Chinese government has decided to export wheat to the United States. Consequently the only source open were the United States and Canada. The result has been that about 40,000 tons of wheat have been brought into the United States, and the Chinese government has reached the market. For political reasons, only relatively small quantities of Canadian wheat have reached the market. The Chinese government has reached the market. For political reasons, only relatively small quantities of Canadian wheat have reached the market. The Chinese government has reached the market. IMPATIENTLY WAITING

MENTAL MUSH

A COLUMN FOR THE COMMON PEOPLE
Why degrade and brutalize our standard-bearers and detectives by compelling them to undergo a series of ridiculous and senseless examinations? When giving evidence in the police court, in regard to the prosecution of a crime, a witness should be allowed to speak freely and without any artificial restrictions. The present system of examining witnesses is a disgrace to the law and to the intelligence of the people. It is a waste of time and money, and it does nothing to help the truth. The witnesses should be allowed to speak for themselves, and the jury should be allowed to decide the facts of the case. The present system is a mental mush, and it should be abolished.

Mr. John Williams would have all his men on the road one year. If the same time of release were employed with the majority of the Alberta M.A.s, on a similar basis, the province would benefit immensely.
